HONEST INTENTON ORGANIZATION

MENTORSHIP PROGRAM REPORT

Introduction

The AHI mentorship program is a program run by the Honest Intention Organization (AHI) in the schools it supports. The objective of the program is to stimulate a journey of self-discovery and development for both the mentor and the mentee, and provide opportunities for exposure to personal fulfillment and achievement. Its purpose is:

- 1) To provide opportunities to students to learn and grow as they are exposed to an ongoing relationship with a caring adult.
- 2) To enable a healthy start in life by facilitating the process of self-discovery and self-awareness.
- 3) To facilitate safe places/spaces to learn and grow.
- 4) To equip students with the understanding and tools to make ethical and informed decisions.
- 5) To shape students into confident human beings with excellent leadership, communication, critical thinking, professionalism and other important life skills.

May Session

The first mentorship session was scheduled for **21st May, 2016** at HOYWIK - Kibera, one of the schools supported by AHI in the 2016 academic year. The theme for the month of May was Introductions/Getting to Know/Expectations.

It was a beautiful day, albeit chilly as the rainy season was just ending. There was quite a bit of traffic due to the Mater Heart Run which had also been scheduled on the same day. This caused the session to start later than it was scheduled to at 10.00 am. There were 12 mentors all together.

The session begun with a warm welcome from the staff at HOYWIK - Kibera and a mini-tour of the school, highlighting the projects which AHI will set up in the months of June/July. Due to the limited time left, as a result of traffic from the Heart Run, the students were put into

groups and introductions between mentors and mentees done. Each group also came up with a name for itself.

Feedback/Recommendations

The following recommendations were made for future sessions:

- 1) Countercheck for other events happening on the same day as the mentorship session to avoid delays due to traffic.
- 2) Have a male and female mentor for each group to allow for gender balance and to ensure that each student is comfortable within their group.
- 3) Recruit more male mentors.
- 4) Involve both teachers and students in capacity building workshops to ensure best practices are adopted once projects are set up.
